

CODY ALEXANDER

TECHNICAL ACCOUNT MANAGER | CUSTOMER ENGINEERING | AI INFRASTRUCTURE

Winter Garden, FL (Remote, US) | 689-234-1073 | cody.alexander.biz@gmail.com | linkedin.com/in/cody-alexander37 | itsmecody.com | github.com/CoodayeA

PROFESSIONAL SUMMARY

Technical Account Manager who owns post-sales technical relationships across a ~40-customer portfolio, from founder-led startups to large enterprises. Five-plus years keeping business-critical analytics infrastructure available (Tableau Server, Alteryx Server) across single-server and clustered high-availability environments, with SLA-backed 24/7 global support. Leads onboarding end to end and runs quarterly reviews that turn platform health and incident history into priorities engineering teams and executive sponsors act on. Comfortable debugging a production issue with a developer in the morning and making the business case to their VP in the afternoon, and stays hands-on building and self-hosting AI infrastructure.

CORE EXPERTISE

Customer & Post-Sales Engineering: Technical Onboarding • Implementation Planning • Quarterly Business Reviews • Adoption & Expansion • Escalation Ownership • Enablement Sessions & Live Demos • Executive & Developer Stakeholder Management • Technical Documentation & Playbooks

AI & Automation: AI Agents • Agent Orchestration • LiteLLM • OpenRouter • OpenAI- & Anthropic-Compatible APIs • Automation Workflows • Model Context Protocol (MCP)

Infrastructure & Operations: Linux • Windows Server • Docker / Compose • PostgreSQL • REST APIs • Networking • High Availability & Clustering • Observability • Incident Response • Root-Cause Analysis

Cloud & Platforms: AWS • Azure • Tableau Server • Alteryx Server • Git / GitHub • Tailscale

PROFESSIONAL EXPERIENCE

INTERWORKS | Technical Account Manager

Jan 2025 - Present

- Own the technical relationship and ongoing service strategy for ~40 customers ranging from founder-led startups to large enterprise environments.
- Lead technical onboarding for every new managed-services customer: kickoff through discovery, implementation planning, environment transition, and handoff.
- Run quarterly service reviews across the full portfolio, translating platform health, incident history, and performance trends into prioritized actions for engineering teams and executive sponsors.
- Debug production issues directly with customer developers and administrators, holding ownership from first investigation through remediation and validation.
- Advise on architecture, availability, and scalability so customers see how infrastructure decisions today affect reliability and growth later.
- Turn recurring customer problems into reusable assets: documentation, internal process, and a biannual customer newsletter created and launched to proactively reach the entire managed-services base.

INTERWORKS | Systems Engineer

Jan 2022 - Jan 2025

- Kept business-critical analytics platforms (Tableau Server, Alteryx Server) available across single-server and clustered high-availability environments for managed-services customers.
- Diagnosed ambiguous infrastructure, configuration, and performance failures across Windows and Linux, handing customers remediation plans they could execute.
- Delivered SLA-backed 24/7 support to customers across global regions, resolving time-sensitive production incidents.
- Monitored and analyzed system health and performance, translating findings into actionable recommendations for platform stability.

INTERWORKS | Systems Administrator

Jan 2021 - Dec 2021

- Supported ~400 global end users while administering Windows and Linux servers, networking, and business-critical applications.
- Led a cross-regional mobile device and policy rollout for employees across the United Kingdom and Europe.

INTERWORKS | Information Technology Intern

Oct 2020 - Jan 2021

- Server administration, ticket operations, and end-user support; promoted into a full-time systems role within three months.

AI PROJECTS

Self-Hosted AI Control Plane | Personal Infrastructure

2025 - Present

- Run a private multi-node homelab exposing an AI control plane over Tailscale: agent orchestration, LiteLLM and PostgreSQL for provider routing and persistent context, spend tracking, permissioned agent actions, backups, and documented rollback procedures.
- Wire OpenAI- and Anthropic-compatible APIs into agent workflows for coding, research, and operational tasks, with human review at the decision points.

EDUCATION

- Central Washington University - B.S., Business Administration & Management / Information Technology, 2018
- Lake Washington Institute of Technology - A.A.S., Computer Programming, 2015
